

BIRDS CARIBBEAN BIRDWATCHING & CULTURAL TRIPS TO CUBA 2025

Experience the adventure of a lifetime
with BirdsCaribbean!

Join esteemed Cuban bird guides Ernesto Reyes and Tania Piñeiro on an unforgettable journey to explore Cuba's spectacular landscapes, vibrant culture, and extraordinary birdlife.

With over **400** bird species recorded, including **29** unique endemics and **21** globally threatened species, Cuba is a birder's paradise. Its expansive landscapes and prime Caribbean location make it a critical stopover and wintering site for over **180** Neotropical migratory species, creating rare opportunities to observe both endemic and migratory birds.

Cuban Tody (Arnaldo Toledo)

Our carefully crafted itinerary takes you to Cuba's premier birding locations, where you'll encounter the island's diverse avifauna. Along the way, you'll connect with Cuban ornithologists, guides, and community members; stay in welcoming *casas particulares* (Bed & Breakfast establishments), and dine in cozy *paladars* (private restaurants), giving you an authentic taste of Cuba's rich culture, delicious food, and warm hospitality. Discover Cuba through its birds, landscapes, and people—join us for an unforgettable experience in 2025!

BirdsCaribbean is offering two exceptional tours in 2025: a 9-day trip in January, and a 12-day trip in March. Led by outstanding certified Cuban guides Ernesto Reyes & Tania Piñeiro, and group leaders Lisa Sorenson (Executive Director, BirdsCaribbean, January trip) and Jeff Gerbracht (Checklist Working Group Co-Chair, BirdsCaribbean, March trip), these tours combine expert guidance with local insight. By traveling with us, you'll not only experience Cuba's remarkable birdlife but also support vital bird conservation programs in Cuba and the Caribbean, helping protect the birds you'll encounter for future generations.

ITINERARY (12 DAY TRIP) – March 19 to 30, 2025¹

Day 1 (Havana, Las Terrazas & Viñales): Meet up with our Cuban guides, Ernesto and Tania at the airport and departure to **Viñales Valley**, the land of tobacco farms and beautiful landscapes with limestone formations called *mogotes*. Lunch at **Las Terrazas UNESCO Biosphere Reserve** and eco-village, offers close-up views of our first Cuban and regional

¹ **Note:** Itinerary is subject to change, depending on the weather and local conditions. We will aim to visit all the sites mentioned, but the timing of when we visit each location may differ from what is outlined here.

endemics (*Cuban Trogon*, *Cuban Grassquit*, *Cuban Green Woodpecker*, *Cuban Emerald*, *La Sagra's Flycatcher*, *Loggerhead Kingbird*) and a lovely setting for our family-style lunch on a patio. Along the way, we will also look for the *Stygian Owl*, *Snail Kites*, and waterbirds in dams built near to the highway. Dinner and check-in at B&B (2 nights).

Day 2 (Viñales): Morning birding nearby in **Viñales National Park/Parque de Viñales** in pursuit of *Cuban Solitaire*, *Cuban Tody*, *Cuban Trogon*, *Red-legged Honeycreeper*, *Western Spindalis*, *Great Lizard Cuckoo*, *Cuban Blackbird*, *Yellow-headed Warbler*, as well as some migrant species like warblers, tanagers, and buntings. During the afternoon, visit to **Benito's Tobacco Farm**, birding in pine forest near **El Albino Reservoir** to search for the *Olive-capped Warbler* and *Yellow-headed Warbler*, **San Vicente Farm** to look for the *Scaly-naped Pigeon*, and possible visit at the home of **Nils Navarro**, renowned Cuban wildlife artist and naturalist and author of *Endemic Birds of Cuba: A Comprehensive Field Guide*.

Viñales Valley with *mogotes* (Carrol Henderson)

Day 3 (Orquideario de Soroa, Niña Bonita Reservoir, and Playa Larga/Zapata): Early breakfast and departure to **Zapata Swamp** (5+ hours), with stops en route to pick up more endemics and migrants and enjoy the magnificent scenery. Target birds at road-side wetlands include *King Rail*, *Northern Jacana*, *Yellow-breasted Crake*. We will also have a tour at the spectacular orchid gardens **Orquideario de Soroa** where we will look for the *Cuban Oriole* and the *Giant Kingbird* with many other birds possible.

Lunch en route and afternoon stop at **Niña Bonita Reservoir** to pick up migratory ducks and other waterbirds. By late afternoon we reach **Playa Larga**, a lovely little beach town on the **Bay of Pigs** on the Zapata Peninsula. **Zapata Swamp** is the third largest wetland in the Americas and the region offers the best birding in Cuba. About **254** species have been recorded for Zapata. It is a Biosphere Reserve and a Ramsar Site, where it is possible to see more than 20 Cuban endemics. Check-in at B&B (4 nights) and dinner.

Day 4 (Zapata: Las Salinas, San Blas wetland, and Casa Ana Birding): Early breakfast and depart by 7 am for Las Salinas Refuge (Las Salinas de Brito, nearby flat, dry-dirt roadway 1+ miles). Habitat varies among low, dense forest, mangrove, marsh, and open wetlands. Here we are likely to encounter the endemic *Cuban Black Hawk* as well as numerous shorebirds, seabirds, and waterbird species, including many *American Flamingo*, *Roseate Spoonbill*, *White Ibis*, *Reddish Egret*, *Wood Stork*, *Clapper Rail*, *Black-bellied Plover*, *Short-billed Dowitcher*, *Red Knot*, *Caspian Tern*, and others.

In the afternoon we will visit **San Blas wetland** to look for the *Red-shouldered Blackbird*, *West Indian Whistling-Duck*, *American Kestrel* (Cuban subspecies), and others. Depending on the time available, we may visit the **Bay of Pigs Museum**, and **Casa Ana Birding**

gardens for fabulous close-up views of the *Bee Hummingbird* (smallest bird in the world!), *Cuban Emerald*, *Cuban Pygmy Owl*, and dozens of warblers.

Day 5 (Zapata: Santo Tomas and Los

Hondones): Early breakfast and departure for **Santo Tomas** (45 minutes) where we will have a lovely and peaceful ride into the swamp via pole-powered boats. Santo Tomas, with its sawgrass tussocks, is the type locality for Zapata Swamp and a classical place to see the *Zapata Sparrow* and *Zapata Wren*, among Cuba's most limited range endemic birds. It's a great location also to see *Gray-fronted Quail-Dove*, *Cuban Pygmy-Owl*, *Cuban Amazon*, *Cuban Parakeet*, *White-crowned Pigeon*, *Cuban Pewee*, *Great Lizard Cuckoo*, *Smooth-billed Ani*, *Cuban Tody*, and *Cuban Bullfinch*, as well as migratory warblers.

Bee Hummingbird, Cuba's most adorable bird and smallest bird in the world. (Ernesto Reyes)

In the afternoon we will visit **Cueva de los Peces**, Cuba's largest underwater saltwater cave; optional swimming and snorkeling at the lovely reef just off the beach. Also, a great place to bird for those who prefer not to swim. And we will visit **Los Hondones**, a lovely eco-village where the community is developing organic farming and planting fruit and native trees—great attractions for many endemic birds, such as the *Bee Hummingbird*, *Blue-headed Quail-Dove*, *Cuban Amazon*, *Cuban Trogon*, *Cuban Tody*, *Cuban Pewee*, *Great Lizard Cuckoo*, *Cuban Emerald*, *Tawny-shouldered Blackbird*, *Cuban Blackbird*, *Yellow-faced Grassquit*, and many migrant warblers. Evening birdwatching for *Bare-legged Owl* and the *Cuban Nightjar*.

Day 6 (Zapata: Bermejás, Soplillar, possibly Enigma de las Rocas Trail): Early breakfast and departure to several sites in/ near Bermejás to search for the *Cuba Parakeet*, *Fernandina's Flicker*, *Key West Quail-Dove*, *Gray-fronted Quail-Dove*, *Blue-headed Quail-Dove*, and *Cuban Vireo*, among other endemic and migratory birds. We will have a delicious lunch at Ningo's organic farm. In the afternoon, we will look for the *Cuban Amazon* as well as other species for which we have not yet had good views or sightings. If we have not yet had a chance to swim or visit the Bay of Pigs Museum, etc. we will use this afternoon for these activities and/or visit Los Hondones or Casa Ana again to enjoy the birds at these sites.

Day 7 (Zapata, Cienfuegos, Trinidad): Morning departure heading east towards our destination, Trinidad, with birding stops en route to look for the *Cuban Gnatcatcher* and *Cuban Palm-Crow*. Cultural stop for coffee in **Cienfuegos**, a UNESCO World Heritage Site. This bay-side city founded by French émigré and known as the "Pearl of the South," has a Parisian feel to it with its parks, tree-lined boulevards and colonnades—great place to spot the *Cuban Martin*. After this we will visit the **Cienfuegos Botanical Garden/ Jardín Botánico de Cienfuegos** for a walking tour, birding, and lunch. Good chance here of seeing a nesting *Gundlach's Hawk* and many other species. **Trinidad**, also a UNESCO World

Heritage Site, is a one-of-a-kind, perfectly preserved Spanish colonial settlement. We will have a little time to explore the cobblestone streets and enjoy the pastel-colored colonial mansions, plazas, and churches (built from huge sugar fortunes) and laid-back atmosphere. We spend the night here.

Day 8 (Trinidad to Cayo Coco): Today we make our way to Cayo Coco and nearby offshore cays on the northern (Atlantic) coast which provide great habitat for a diversity of waterbird species, including the *West Indian Whistling-Duck*, migrants, and restricted-range and endemic subspecies. Since 1988 Cayo Coco has been connected to the mainland by a 27km causeway. The islands offer pristine white-sand beaches, mangrove flats, low coastal scrub and crystal-clear waters, however, the area is being rapidly developed for “sun and sand” tourism and the habitat of many important species may become threatened. We still stop en route to look for the *Cuban Crow*, *Cuban Palm Crow*, *Giant Kingbird*, *Wilson’s Snipe*, *Snail Kite*, *White-cheeked Pintails*, *Fulvous Whistling-Ducks*, and others. We will check into our hotel on Cayo Coco (2 nights) by early afternoon and bird on the beach to look for *Piping Plover*, *Red Knot*, and other migratory shorebirds.

Day 9 (Cayo Coco Cays): Early morning birding on **Cayo Paredón Grande**, the most northeastern cay in the archipelago and one of Cuba’s important migratory landfalls. We will search for the *Bahama Mockingbird*, *Bahama Swallow*, *Cuban Gnatcatcher*, *Oriente Warbler*, *Gundlach’s Hawk*, *Scaly-naped Pigeon*, *Mangrove Cuckoo*, *Thick-billed Vireo* and a subspecies of *Zapata Sparrow* are also target birds for the archipelago. Lunch at the hotel. The afternoon will be spent spotting migratory birds in the mangrove wetlands and coastal habitat on **Cayo Guillermo** and **Cayo Romano**. **Cueva del Jabali** is a great place to spot *Key West Quail-Dove*, *Zenaida Dove*, *Cuban Tody*, *Oriente Warbler*, *La Sagra’s Flycatcher*, *Red-legged Honeycreeper*, *Cuban Vireo*, *Painted Bunting*, and many other migratory songbirds. Overnight at our hotel.

Day 10 (Cayo Coco to Havana): Today we make our way back to Havana (~5 hrs.) with brief birding stops and lunch en route. In the afternoon we will visit **Finca Vigía** (Lookout Farm) to tour Ernest Hemingway’s estate, located in the town of San Francisco de Paula, 10 miles east of Havana. Hemingway purchased the property in 1940 and lived there for 20 years. This is where he wrote his celebrated novels: *The Old Man and the Sea* and *For Whom the Bell Tolls*. The beautiful house and property, restored by the Cuban government, is now a museum, with Hemingway’s furniture, books, paintings, animal trophies, and other collectibles from his travels around the world on display. The house is listed as one of the 11 Most Endangered Places by the National Trust for Historic Preservation and on the World Monuments Fund’s list of 100 Most Endangered sites. Visiting Finca Vigía is a must for Hemmingway fans and great for non-fans as well as it also offers excellent birding on the property! Check into your B&Bs in Havana (2 nights), followed by dinner and music/dancing (optional).

Days 11 (Havana): A full day in Havana with diverse cultural activities including a walking tour of Old Havana and old-fashioned car ride. Other possible activities include visiting an art gallery or museum, street markets, or the Botanical Gardens in Havana, a lovely place to bird and enjoy native tropical plants. Final dinner at a nice restaurant and live Cuban music and dancing into the evening (optional).

Day 12: Breakfast, check-out and transfer to the Havana Intl Airport for the one-hour flight to Miami.

Number of Travelers: Max. 10 plus guides

Possible Cuban endemic birds to see on this trip include: Cuban Black-Hawk, Gundlach's Hawk, Blue-headed Quail-Dove, Gray-fronted Quail-Dove, Bare-legged Owl, Cuban Pygmy-Owl, Bee Hummingbird, Cuban Trogon, Cuban Tody, Cuban Green Woodpecker, Fernandina's Flicker, Cuban Parakeet, Cuban Palm-Crow, Cuban Vireo, Zapata Wren, Cuban Gnatcatcher, Cuban Solitaire, Yellow-headed Warbler, Oriente Warbler, Cuban Grassquit, Zapata Sparrow (also Cayo Coco subspecies, *T. inexpectata varonai*), Red-shouldered Blackbird, Cuban Blackbird, Cuban Oriole, Cuban Bullfinch, Cuban Nightjar, Cuban Palm-Crow.

Cuban Trogon (Nils Navarro)

Other species of interest (including regional endemics and Caribbean specialties) include: West Indian Whistling-Duck, White-cheeked Pintail, Great Great Lizard-Cuckoo, Cuban Amazon, West-Indian Woodpecker, La Sagra's Flycatcher, Cuban Pewee, Giant Kingbird, Loggerhead Kingbird, Cuban Crow, Red-legged Thrush, Bahama Mockingbird, Olive-capped Warbler, Western Spindalis, Key West Quail-Dove, Ruddy Quail-Dove, Zenaida Dove, Plain Pigeon, Stygian Owl, American Kestrel (Cuban race), Antillean Palm Swift, Thick-billed Vireo, Cuban Emerald, Greater Antillean Grackle, Tawny-shouldered Blackbird, Eastern Meadowlark (Cuban race), American Flamingo, Wood Stork, Roseate Spoonbill, a great variety of waterbirds, and numerous other migratory and resident species.

The cost of the 12-day trip is \$4,395 (based on a max of 10 participants). This covers the following:

- Cuban Visa (\$100)
- Health insurance while in Cuba
- In-country transportation and driver through duration of trip
- Professional bilingual specialized bird guide (Tania Piñeiro)
- Group leader (Jeff Gerbracht)
- All lodging
- All meals and non-alcoholic beverages while in Cuba, tips at restaurants
- Admission fees (itinerary locations only)

Not included:

- Airfare to Miami and overnight in this city (March 18th) to be in position to depart for Havana on the morning of March 19th

- Airfare from Miami to Havana and return
- Tips for housekeeping, bird guide and driver, alcoholic beverages \$1–\$3
- Luggage fees and airport departure tax
- Single supplement (may not always be available) – add US\$600

We are traveling to Cuba under a group “Support for the Cuban people” license. Support for the Cuban people programs are licensed by the OFAC Department of Treasury. We will have a fulltime schedule of activities that enhances contact with Cuban people, provides support for private businesses and independent activities of Cuban people, and strengthens civil society in Cuba.

To reserve your spot on the trip:

Fill out the registration form at this link bit.ly/Mar25Cuba and submit your deposit of **\$500** as soon as possible but by **December 15th, 2024** latest. Final payment is due on **January 30th, 2025**.

Preferred forms of payment for the tour deposit (\$500) and balance are check, ACH transfer, Zelle, and/or credit card. Please notify us about your preferred method for sending the deposit and final payment. You may also pay your deposit via our [secure Buy Now link on our website](#). Any questions about payments, contact our Operations Manager, Alexia Morales (Alexia.Morales@BirdsCaribbean.org).

Mail your check (made payable to BirdsCaribbean) to:

Zelle (online bank to bank transfer, free for both parties, most banks offer Zelle and it’s easy to sign up) – send money to: 508-333-8587 or Lisa.sorenson@birdscaribbean.org).

About our Guides:

Ernesto Reyes Mourino is a biologist, award-winning wildlife photographer, conservationist, and bird tour guide with more than 20 years experience with birds in Cuba, Honduras, Colombia, Costa Rica, Dominican Republic and the Bahamas. He is well known as one of the premiere guides in Cuba with a keen ability to find and share Cuba’s amazing birds and biodiversity. He is also a warm and wonderful person, taking great care to ensure that everyone enjoys the trip, with much kindness and good humor. Ernesto has completed BirdsCaribbean’s Interpretive Bird Guide Training Workshop in Cuba (October 2017) and is certified as a Level 5 (highest level) Caribbean Birding Trail Guide. [Ernesto’s eBird Caribbean profile](#); [E&T Birding Tours](#); [Facebook WildPhotoErnest](#); Ernesto’s Instagram [WildPhotoErnest](#)

Tania Piñeiro is a Geographic Information System (GIS) specialist who has worked since 1995 in the most important birding site in Cuba, Zapata Swamp, as a conservationist and protected areas planner. Since 1999, she has been on the team working to highlight Cuba as a natural tourism destination for Cuba’s National System of Protected Areas (SNAP). Tania has been organizing and leading birdwatching tours since 2015. She has developed a reputation as one of Cuba’s outstanding guides with a keen ability to find and share Cuba’s amazing birds and biodiversity. She is also a warm and generous person, taking great care to ensure that everyone enjoys the trip, with much kindness and good humor. Tania received certification as a Level 5 (highest level) Caribbean Birding Trail guide, having completed BirdsCaribbean’s Interpretive Bird Guide Training Workshop in Cuba (October 2017). [Tania’s eBird Caribbean profile](#); [E&T Birding Tours](#); [Facebook Birding in Cuba Tania](#); Tania’s Instagram [Birding Cuba Tania](#). <https://www.et-birding-tours.com>

Jeff Gerbracht’s birding 'career' started at the age of 9 when one of his brothers and him decided to have a bird ID competition on a family vacation to Alaska. He has no idea who won, but both have been birders ever since. Jeff works for the Cornell Lab of Ornithology as the lead software architect for Birds of the World and eBird; he gets to enjoy both working on and using eBird around the world and especially the West Indies. He has been part of BirdsCaribbean for many years and he’s currently co-chair of the monitoring and checklist working groups. Jeff: “Working with both BirdsCaribbean and the Lab has really allowed me to mix my passions for software development, birding, bird conservation, and the Caribbean.”

Who is BirdsCaribbean

We are a vibrant network of members and partners committed to conserving Caribbean birds and their habitats in the insular Caribbean through education, conservation, science and action. As the leading 501 (c) 3 **nonprofit** conservation organization in the Caribbean, we are the “hub” for all things “Caribbean Birds.” Learn more at: www.birdscaribbean.org/ or find “Birds Caribbean on Facebook, Instagram and Twitter (@BirdsCaribbean). A portion of the proceeds from this trip will help support our conservation programs in Cuba and the Caribbean. After the trip, you will receive a receipt for the “donation” portion of your trip payment which can be used for a tax deduction (past trips have been ~\$500).

What is the Caribbean Birding Trail

The Caribbean Birding Trail is being developed to raise global awareness of the unique birds and biodiversity of the Caribbean and to create a sustainable economy around these rare species, in an effort to protect them. This project is an initiative of BirdsCaribbean. We have partnered with and/or trained local tour companies and guides, have first-hand knowledge of the best birding and heritage sites to visit, and know the communities and NGOs that are working to conserve Caribbean birds and nature. Our tours are well-suited for birdwatchers, nature lovers, wildlife photographers, and anyone looking for authentic, unique, and revelatory experiences. Travel with us and know that your tourism dollars will bring benefits to the organizations, communities, and people that will put it to the best use. Learn more at caribbeanbirdingtrail.org/.

Additional details:

Once you have registered to go on the trip you will receive more information, including what to bring, what to wear, bird checklist, and travel in Cuba, which is an inimitable experience and part of the fun!

Rules, Terms and Legal Conditions:

- Participants agree to indemnify BirdsCaribbean and its representatives, from any and all third-party liability for any injuries, loss, claim, action, demand or damage of any kind arising from or in connection with participating in one of our field trips. Participants are required to sign a Liability Release Form (see below).
- BirdsCaribbean reserves the right to adjust the price of the tour if there is an unexpected increase in costs, or if the tour is not filled to a minimum capacity.
- BirdsCaribbean reserves the right to adjust the tour itinerary if unexpected circumstances warrant a change. Every effort will be made to provide a similar high-quality experience.
- In case of cancellation by BirdsCaribbean, all deposits and payments will be refunded (less a \$50 processing fee).
- Your deposit is nonrefundable. If you cancel your reservation more than 30 days prior to the tour (by February 17, 2025), you will receive a 50% refund of fees paid over the deposit. If you cancel less than 30 days prior to the tour, all deposits and payments are non-refundable, unless you can fill your space with another participant.
- We **strongly advise that you purchase trip insurance** in case of emergency or if you need to cancel your trip before or during the tour.
- **COVID-19:** We want to do everything we can to reduce the risk to travelers, guides, and the communities we visit. Conduct a self-health assessment and carry out precautionary testing if needed. If you exhibit symptoms, please take the necessary precautions, like wearing a face mask, washing hands frequently, and ensure proper social distancing.

Assumption of Risk and Liability Release Form – must be filled out to register for this trip. Fill it in online here: bit.ly/Liability-Form-2025

Testimonials from past tour participants:

The trip was well-organized and every moment was memorable. We, of course, enjoyed the birds foremost. We enjoyed meeting Nils, walking the streets of Viñales, seeing local art and landscapes, eating local food. The customs and habits of the locals were fascinating to us. It was like a time warp to a time even prior to when we were born. We always felt safe. Walking after dark through Playa Larga and late at night around old Havana never made us uncomfortable. We enjoyed meeting and getting to know every fellow traveler. – *Don and Dena McKee*

Fabulous birding tour with most of the endemics seen in a very short time. The landscape was impressive, the people fascinating to see and talk to, and the food was delicious and abundant. Staying in the *casas particulares* was a good experience to be able to assist the local people in their economy. Excellently organized and well-rounded tour with fantastic guides of the highest standard. I will return to Cuba. - *Coppelia Hayes*

Our bird guides, Ernesto Reyes and Tania Peñeiro, were very kind and patient. They are both excellent birders with an amazing ear. It was wonderful to also meet the local experts, like Nils Navarro, Orlando Garrido, Rosendo Martinez and Lourdes Mugica. They were all personable, generous and added much to our experience. – *Carrie Dortch*

It was a pleasure to be on a trip where one was able to enjoy the cultural aspects of the country and learn something of its history and yet even though time was devoted to that, we didn't miss out on birds, a variety of birding locations, and sightings of Cuban endemics and near endemics. We had great view of very special birds, like the Cuban Trogon, Cuba Tody, Bee Hummingbird, Cuban Oriole, Cuban Pygmy Owl and many more. Every day as well as overall seemed to be an excellent balance between birding and/or bird-associated activities and other cultural and historical pursuits. A very well-rounded trip with outstanding guides and trip leaders and many memorable experiences! – *Philippa Randall*

I have been on a number of birding tours both in the US and in other countries. This tour ranks way up at the top of the list. The number of birds seen and the quality of the sightings was superior but our leaders' in-depth knowledge of the country's history, culture, geology, government, and people made it a first-class experience. – *Barbara Males*

BirdsCaribbean Birdwatching and Cultural Trip to Cuba is the perfect trip for birders seeking endemics and a window into the culture and history of an island that has been off limits to US citizens for 50 years. Birding takes you to the countryside and the sea. The leaders take you to the small cities, the places of interest that highlight modern Cuba's agricultural aspects and they help interpret the history as well as Cuba's hopes and aspirations. What tips the balance in making the trip special is that proceeds go to conservation in Cuba and other Caribbean Islands. – *Anne Brooks*

The experience in Cuba far exceeded my expectations in terms of wildlife, culture and an interesting and congenial group of participants and leaders. – *Carl Gerhardt*

The trip was superb. In addition to seeing the amazing Cuban endemic birds, we met some extraordinary environmentalists and ornithologists, and had the opportunity to see Cuba as it is now. The sensitivity and thoughtfulness behind the planning of this BirdsCaribbean trip made it a uniquely varied and rewarding experience. – *Gale Page*
